New Delhi, India | +91-8448769791 | kumaraniketn@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

M.Sc. in Financial Engineering | WorldQuant University 2025 – 2027 (Expected)
B.Sc. in Data Analytics | DSEU Shakarpur-2 Campus | **GPA: 3.82/4.0 (Rank 2)** 2022 – 2025

PROFESSIONAL EXPERIENCE

Drivio Technologies — Gurugram, India

Associate Product Manager

Dec 2025 – Present

- **Fintech Product Ownership:** Own end-to-end loan journeys for a two-wheeler marketplace, managing stakeholders and integrating core banking APIs for KYC, disbursement, and repayment in the LMS.
- **HRX/HRMS Management:** Managed the HRX/HRMS system end-to-end, overseeing offer letters, onboarding, employee management, payroll, and payouts.
- **Agentic Frameworks:** Built LLM content generation agents with structured output validation, optimizing latency and consistency across architectures.

Business Analyst

Nov 2024 – June 2025

- **Process Automation & AI:** Led AI implementation for a used-car finance system, deploying LLM automation to accelerate loan processing and credit decisions.
- **Content Generation:** Fine-tuned LLM content agents for marketing, automating multi-channel asset creation to cut turnaround time.

Okinawa Institute of Science and Technology (OIST) — Okinawa, Japan

AI Research Intern

June 2025 – Feb 2026

- **Graph Machine Learning:** Developed GNN algorithms to analyze ecological food webs and model energy-flow dynamics, boosting predictive accuracy.
- **Multi-LLM Ensembles:** Engineered data pipelines using multi-LLM ensembles (Gemini, DeepSeek, Anthropic, OpenAI) to synthesize semantic representations.

Analy Assist — New Delhi, India

Business Consultant & Analyst

Mar 2023 – July 2023

- **Go-To-Market Strategy:** Facilitated GTM launches for 4 startups across food, health, and fashion via market research and cross-functional execution.
- **Financial Analysis:** Executed cost analysis during client engagements, delivering executive reports with insights that reduced expenses by 15%.

PROJECTS

- **Laya — Automated SEO Intelligence & Generation System:** Engineered an automated SEO pipeline integrating web scraping, SERP ranking analysis, and LLMs to generate optimized content, reducing content creation cycles by 70%.
- **Prompt-Based Business Intelligence System:** Built a natural language query engine over SQL databases enabling non-technical stakeholders to perform self-serve data analysis, driving faster executive decision-making.
- **osTicket — AI/Automated Ticketing Workflow:** Integrated LLM-based categorization and auto-response routing into osTicket, streamlining support desk operations and improving resolution turnaround times.
- **AI Content Generation & Multi-LLM System:** Designed a multi-model orchestration framework using structured output validation to automate multi-channel content workflows and improve response accuracy.

TECHNICAL SKILLS

Core NLP & ML: Generative AI, Transformers, Retrieval-Augmented Generation (RAG), Fine-Tuning, Prompt Engineering, Graph Neural Networks (GNN), AI Evaluation, AI Security

Languages & Frameworks: Python (PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas), R, SQL, JavaScript.

Tools & Platforms: Git/GitHub, Tableau, Power BI, SPSS, Excel/financial modeling, Google Analytics, Jira, Confluence.

Key Competencies: Feature Engineering, Scalable Pipelines, A/B Testing, Experiment Tracking, Stakeholder Management.
